Schneider expands the Makers Line with a new Paint-It Brush Pen 070.

[Brush pens](#) are also known as fibre-tip pens or fudge pens. The flexible brush tip allows dynamic writing and colouring. They are suitable for experimenting with light and firm pressure and thus create different line widths - thick lines with a lot of pressure when stroking from top to bottom, thin lines when stroking from bottom to top.

The brush pens are ideal for hand lettering, greeting cards, calligraphy, sketch notes, bullet journals, colouring and much more. They inspire you to try things out, create, colour and re-colour. Interesting effects can also be created by combining them with other writing instruments. Mixing styles and techniques produces beautiful results. Colours then flow into each other to create great gradients or shadows. This allows every creative person to realise their own ideas and projects. Whether you are a beginner or an advanced artist, working with the high-quality Schneider Brush Pens "Made in Germany" is not only great fun, but also helps to slow down any stressful everyday life. Calmness, patience, concentration, finding your own style and time passes by itself.

The Schneider Paint-It Brush Pen 070 has a pen body made of 88% bio-based plastic and a high-quality, elastic and plastic encased brush tip. It has been awarded with the world's most famous eco-label "Blue Angel". It contains a water-based ink that dries quickly and is low-odour.

It is available in 10 colours, in the basic colours black, red, blue and 7 pastel shades. The brush pens are offered in different colour-coordinated packaging [units in a 4-](#), [6 \(5+1\)-](#) or [10 \(8+2\) cardboard wallet](#). They are also available in an assorted-colour unit of 10, as well as in 80-pieces cardboard and SiS displays.
