## **Sustainable highlighter Job: Now awarded with the German Environmental Label "Blue Angel".**

Schneider is advancing the sustainability of its products with innovative materials such as bio-based or recycled plastics. Another success story in sustainability is now achieved by Schneider with the tried and tested highlighter Job, which can now be completely manufactured from environmentally friendly and resource-saving components.

The highlighter body is now made of 90% recycled plastic, the internal reservoir and the chisel tip are likewise made from recycled fibers, and the ink is made from bio-based raw materials.

This makes the Schneider highlighter Job a stronghold of implemented ecological arguments.

For this achievement, it has now been awarded the 40-year-old, globally recognized and coveted German Federal Government's environmental label "Blue Angel". The Blue Angel sets demanding standards for environmentally friendly products and services independently and credibly. The label provides orientation for sustainable purchases for public authorities, commercial decision-makers, independent businesses and private consumers.

The Job highlighter lies flat, elegantly, and comfortably in the hand. A gentle hill on the practical clip surface serves as a pressure point for pushing the cap with the thumb to open it. Circular hollows with the embedded Schneider logo on both sides of the body are automatically recognized as the correct holding points.

The smart highlighter also shines with brilliant highlighting results on standard copy and fax paper and is equally suitable for school, study, office, or creative work in bullet journals and hand lettering. With its large ink supply, the Job ensures a long service life and marks more than 15,000 words per refill. The universal ink has maximum luminosity and is light resistant. The chisel tip allows for two line widths, 5 mm or 1 mm. Six fluorescent colours and six pastel colours are available. For the common neon colours, there is a "Refill-station Maxx 660" with 30 ml each. This makes it easy and clean to refill the highlighter. This is not only good for the environment but also for the wallet.

Schneider's colourful, sustainable [highlighters](#) are an excellent choice for those who value quality "Made in Germany" and sustainability. The all-rounder not only marks but also protects the environment. It has been, is, and remains an indispensable everyday tool. Those who mark cleverly have to read less and thus save a lot of precious time.
